

I am writting in response to the coming ruling on LPFM over Translators. I live in rural Colorado and enjoy listening to stations and formats that are not readily available in the area due to cost and location. I listen to K-LOVE as I travel in the area, it is wonderful to have a station with the format I prefer (Adult, Contemporary Christian). K-LOVE provides Christian music to this area from Denver. If K-LOVE were to be displaced by an LPFM signal we would lose that important segment of the music genre. K-LOVE also provides a connection to other communities by broadcasting across the country. The loss of this station, indeed this broadcast frequency, across the country would create areas that would lose the connection to their preferred broadcast format, whatever that may be. I urge you to not provide LPFM precidence over translator signals.
